Sample information

ID: FN1_42

Class: SF1_15yr

Disturbance year: 2005

Source: Visual interpretation of Landsat time series

Annual Landsat images (RGB SWIR1-NIR-GREEN)

RGB composites from 1984 to 2017 for the sample area (represented in white at the center) and its surroundings within a radius of 1 km.

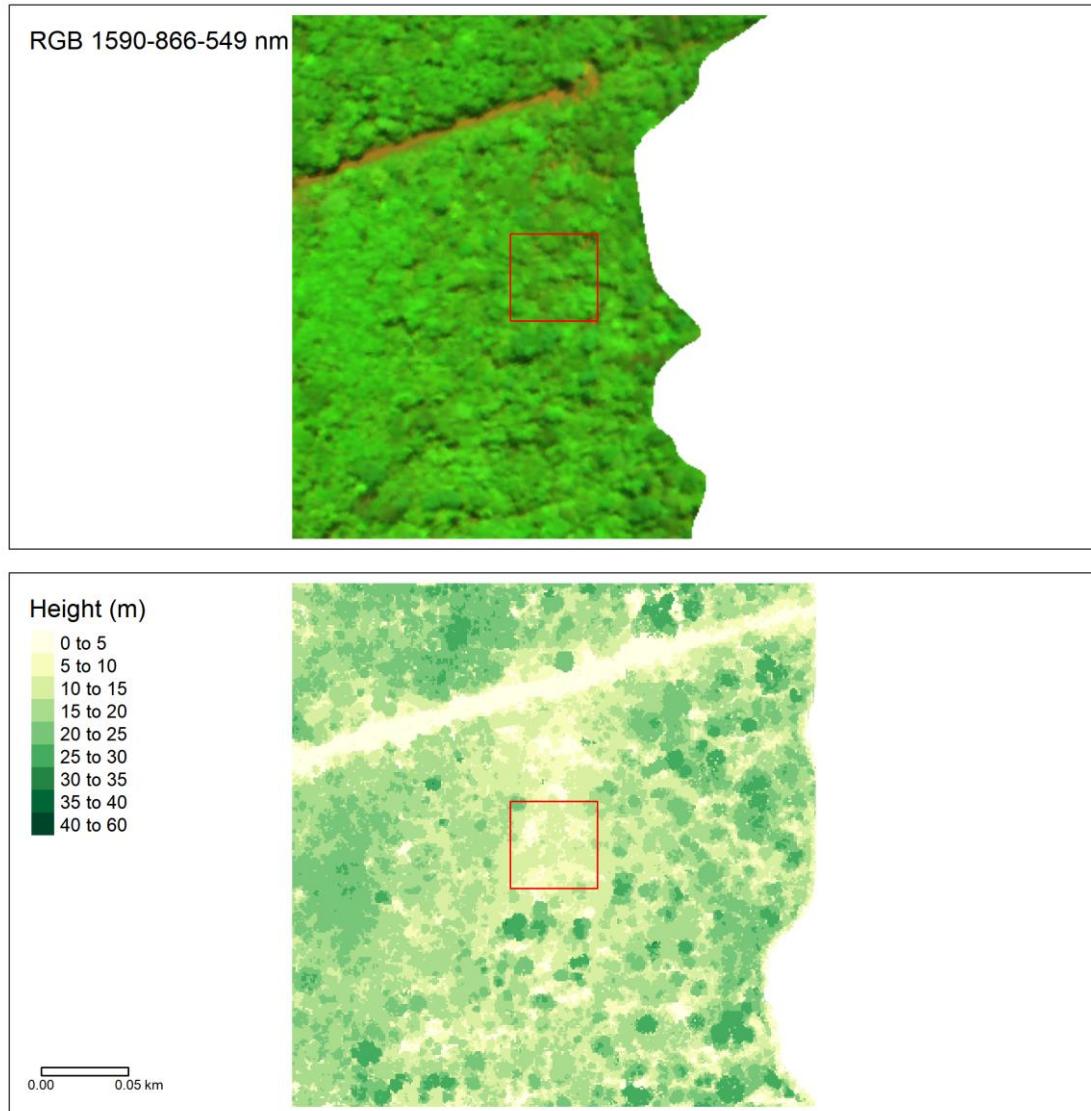

Auxiliary disturbance data

Auxiliary data for the identification of disturbance class for the sample area (represented by the red square) and for a 125 m radius around the sample.

Hyperspectral RGB composite and LiDAR canopy height

RGB composite from the hyperspectral data (top) and LiDAR canopy height (bottom) for the sample area (represented by the red square) and for a 125 m radius around the sample.
