Sample information

ID: ALF_10

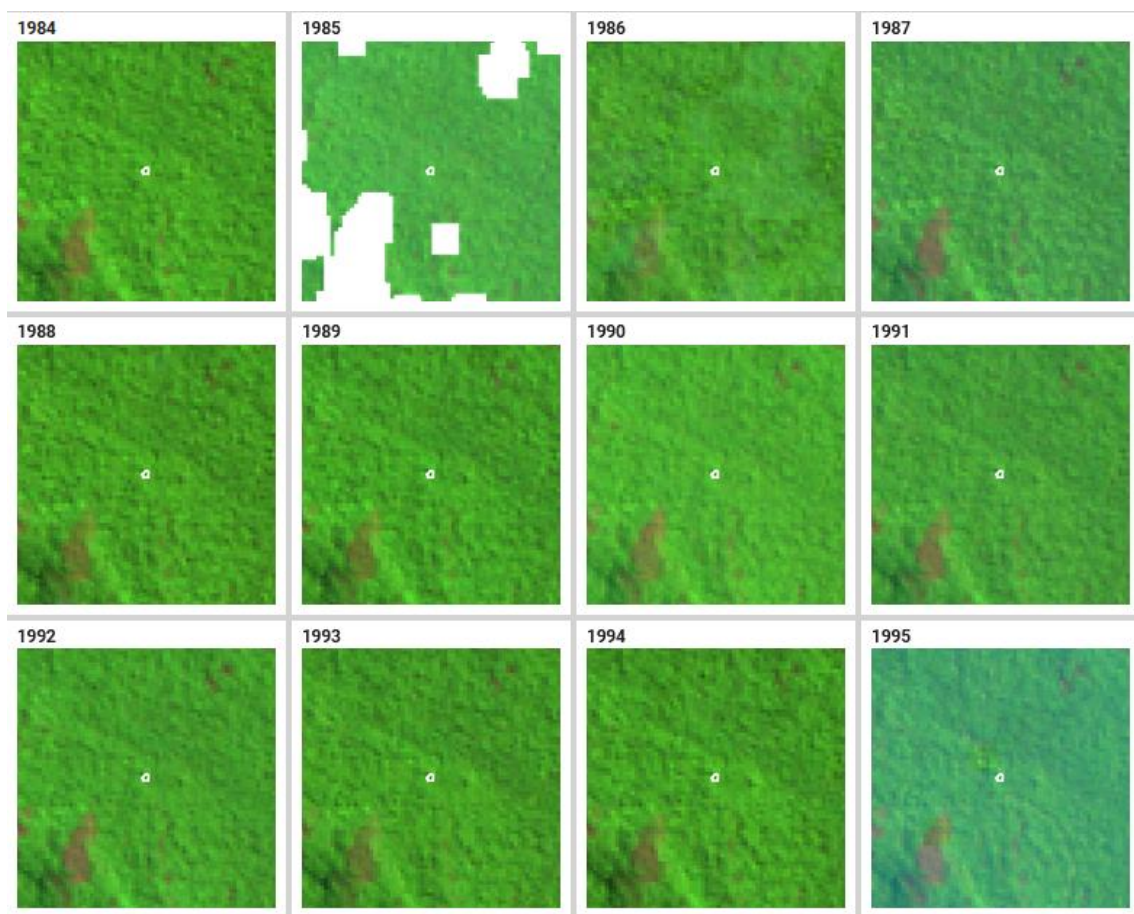

Class: SF1_15yr

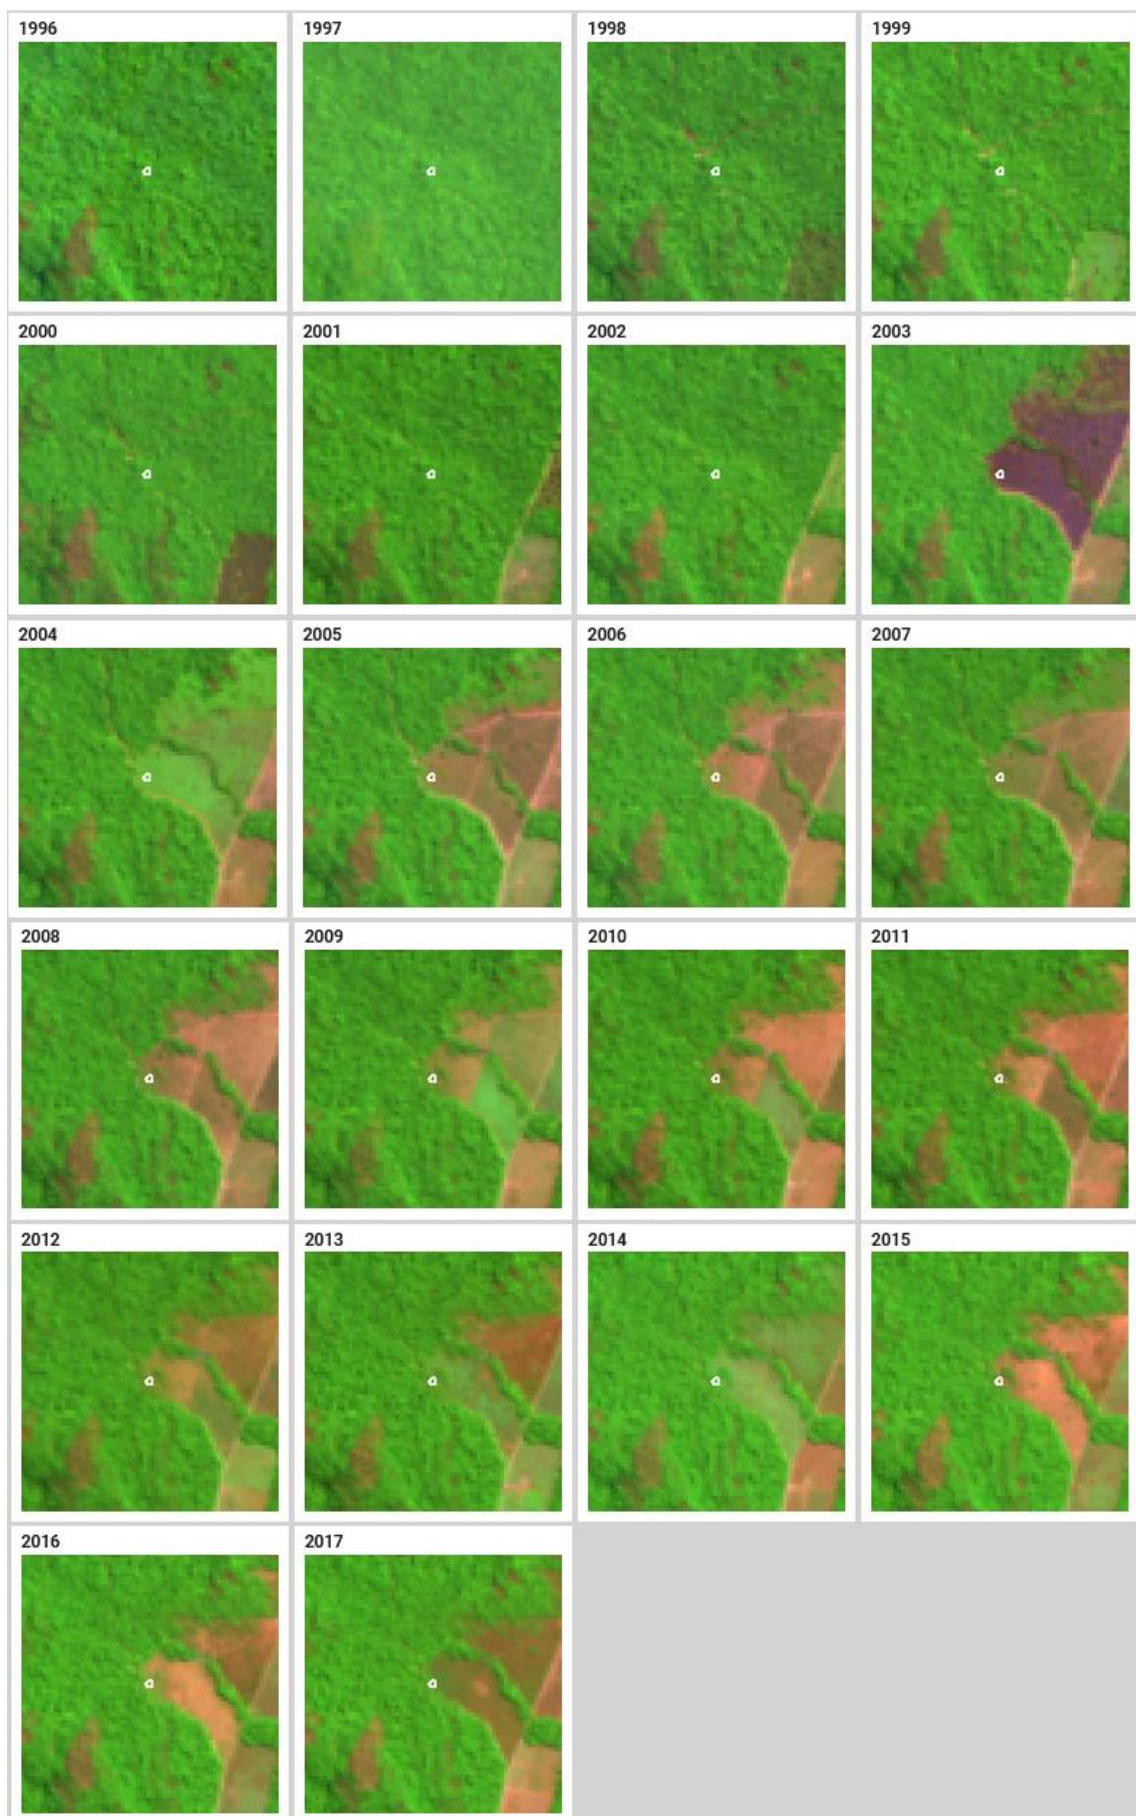

Disturbance year: 2003

Source: Visual interpretation of Landsat time series and high-resolution image from Google Earth + auxiliary data (Turubanova et al., 2018; Tyukavina et al., 2022)

Annual Landsat images (RGB SWIR1-NIR-GREEN)

RGB composites from 1984 to 2017 for the sample area (represented in white at the center) and its surroundings within a radius of 1 km.

High-resolution images from Google Earth

Image from 2003:

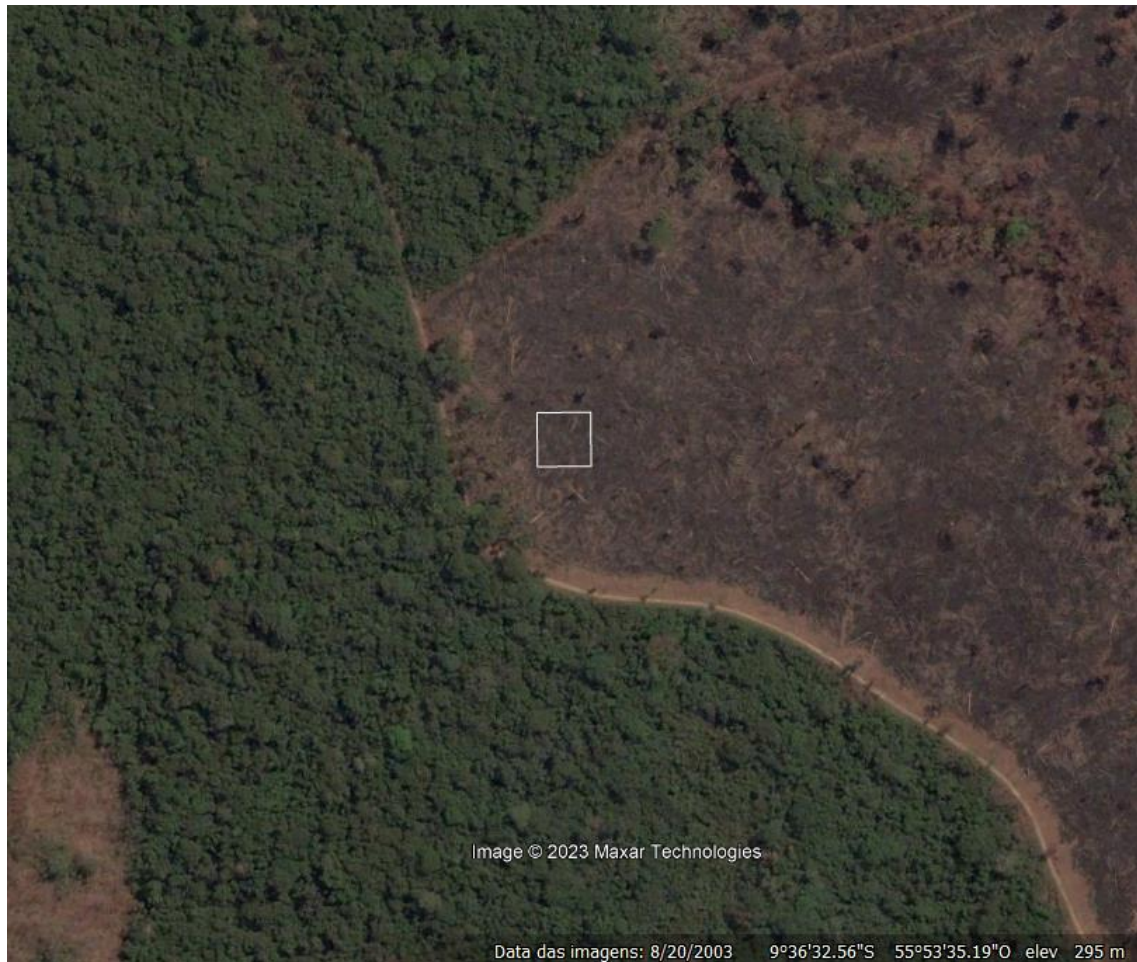

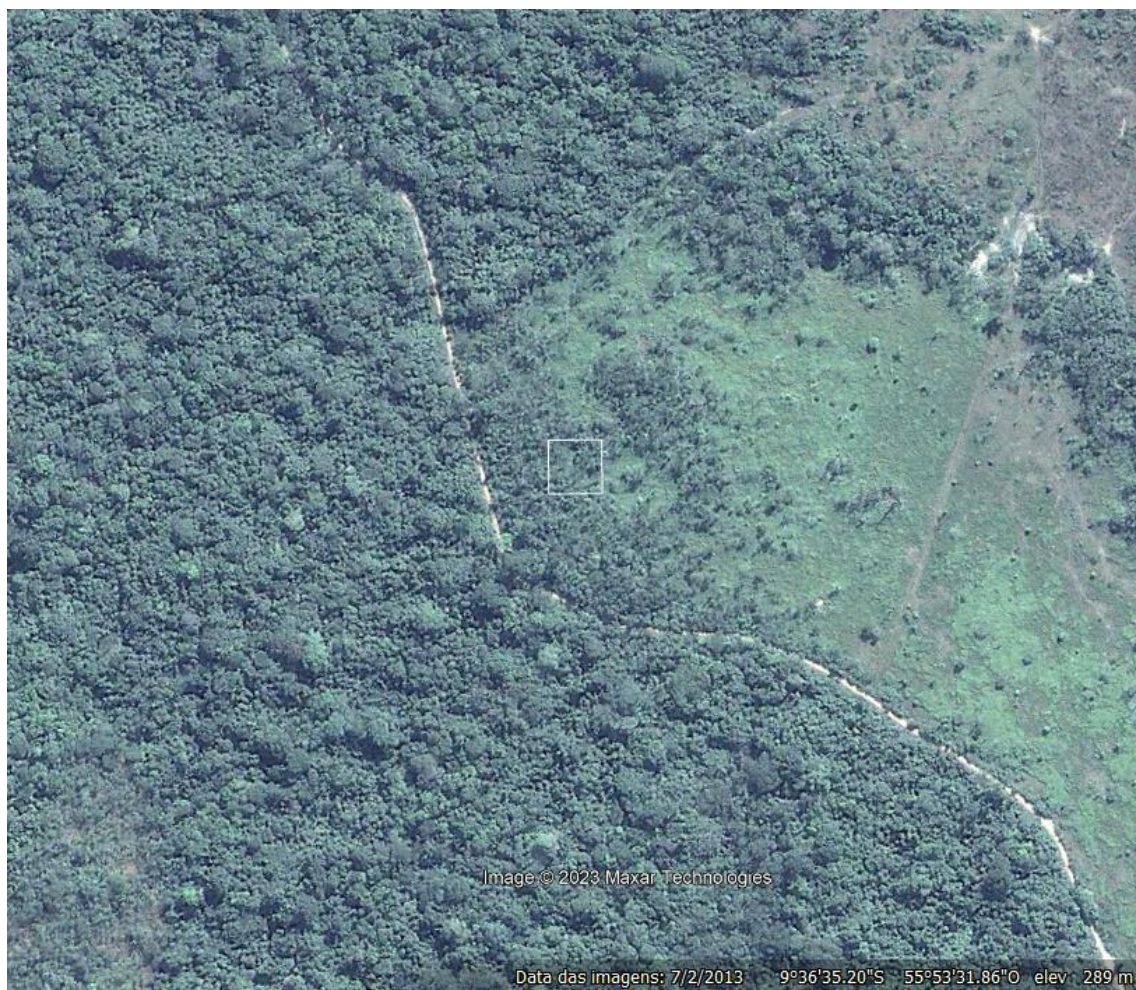

Image from 2013:

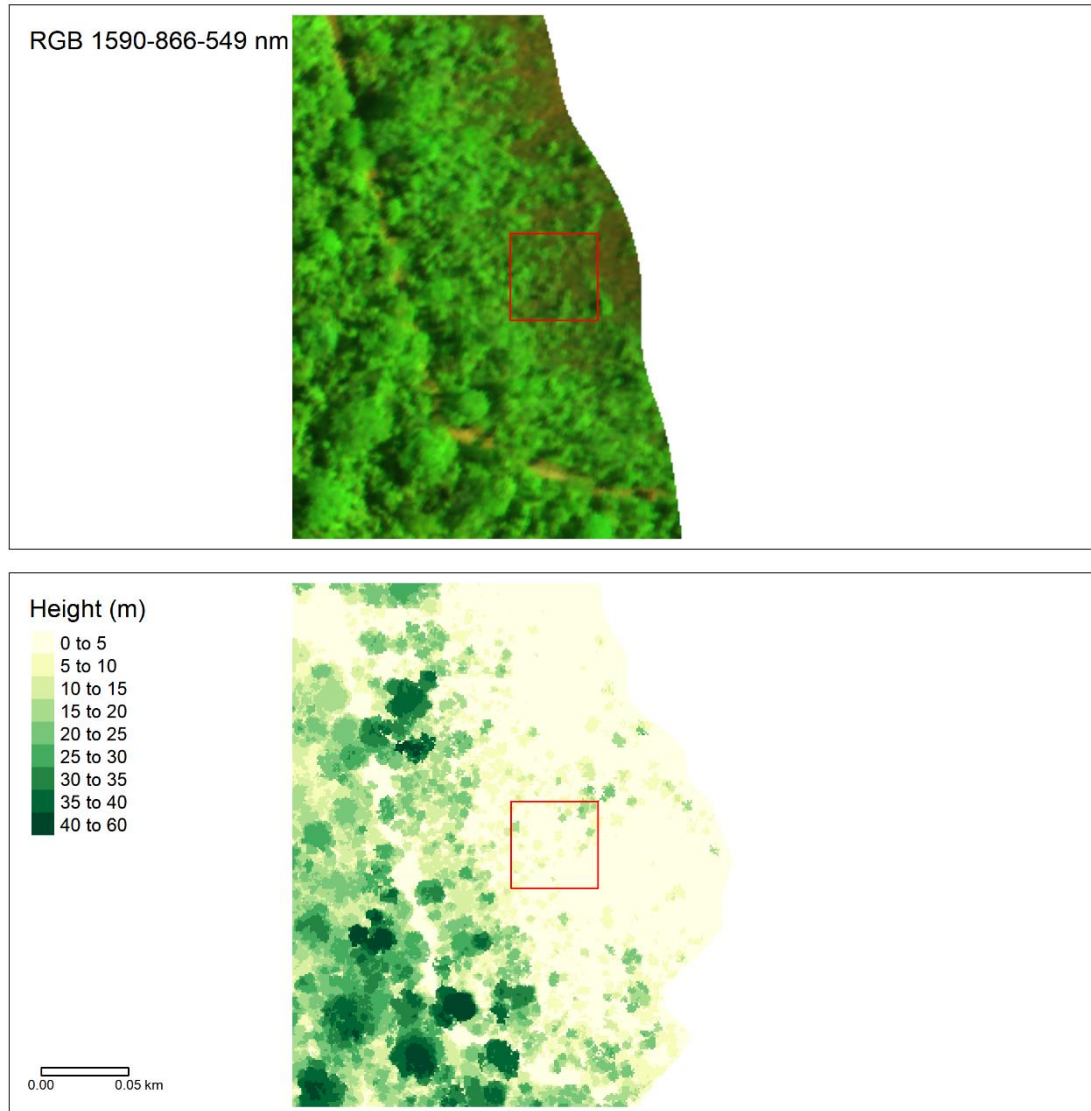

Auxiliary disturbance data

Auxiliary data for the identification of disturbance class for the sample area (represented by the red square) and for a 125 m radius around the sample.

Hyperspectral RGB composite and LiDAR canopy height

RGB composite from the hyperspectral data (top) and LiDAR canopy height (bottom) for the sample area (represented by the red square) and for a 125 m radius around the sample.
